| Available to Onboard: November 2026 | Graduation: Sept 2026 |

PROFESSIONAL SUMMARY

Computer Science student specializing in Artificial Intelligence, Big Data, and Digital Systems Security. Experienced in translating business requirements into technical workflows through product-focused projects, system design initiatives, and hackathons. Strong communication, stakeholder coordination, and analytical problem-solving skills supported by both technical and leadership experience.

EDUCATION

University of Wollongong | Singapore | Oct 2024 - Sept 2026 (Expected)

Bachelor of Computer Science (Double Major in Digital Systems Security & AI and Big Data)

- **Relevant Coursework:** IT Project Management, Database Systems, AI & Machine Learning, Big Data Mining, System Security, Cryptography, Algorithms & Data Structures, Web Security.

Wenzao Ursuline University of Languages | Kaohsiung, Taiwan | Sept 2018 - June 2023

Associate degree in German with a minor in English

ACADEMIC PROJECTS & EXPERIENCE

TradeReady - AI-Powered Cross-Border Compliance Platform | SEA x OpenAI Hackathon | June 2026

- **Analyzed** cross-border trade compliance requirements and translated regulatory constraints into structured digital workflows.
- **Defined** solution requirements and coordinated planning activities, helping the team achieve a Top 40 finish among nearly 400 registered teams.

RingCT E-Voting System (Requirement Analysis & Workflow Design) | Final Year Project | Ongoing

- **Led** requirement analysis and authentication workflow design for a privacy-preserving electronic voting platform.
- **Produced** technical documents, PRDs, user flows, and security specifications that aligned business requirements with technical implementation.

Ad Traffic Filtering System (Process Analytics & Monitoring)

- **Evaluated** clickstream behaviour and identified traffic anomalies affecting platform reliability and user experience.
- **Translated** analytical findings into monitoring workflows and system improvement recommendations to support decision-making.

HackXperience 2025 Web App | SIM IT Club Hackathon | May 2025

- **Gathered** user requirements and designed workflow solutions for a collaborative gift-planning platform.
- **Coordinated** feature testing and iterative improvements under compressed delivery timelines.

CO-CURRICULAR & LEADERSHIP EXPERIENCE

SIM - University of Wollongong Student Council (UOWSC) | Aug 2025 – Feb 2026

- **Coordinated** communications among students, university stakeholders, and external partners during large-scale initiatives.
- **Managed** operational planning, issue resolution, and event execution while balancing competing priorities and deadlines.

TECHNICAL SKILLS

- **Business Analysis:** Requirements Gathering, Workflow Design, Process Mapping, Documentation, Stakeholder Coordination
- **Product & Analytics:** PRD Authoring, User Workflow Design, Data Analysis, SDLC
- **Technical & Tools:** Python, SQL, REST APIs, MySQL, PostgreSQL, MongoDB, Git, Figma (Wireframing & Mockups), Taiga, Excel
- **Spoken Languages:** Mandarin (Native), English, German (B1), Basic Korean & Japanese
