

Nora Pan Ting-Yu

Backend & AI Software Engineer | Risk Control & Infrastructure | Python, C++, SQL

| WhatsApp: +65 8941 7357 | p.nora25n@gmail.com | [LinkedIn](#) / [Portfolio](#) |

| Available to Onboard: November 2026 | Graduation: Sept 2026 |

PROFESSIONAL SUMMARY

Computer Science student specializing in Digital Systems Security, Artificial Intelligence, and Big Data. Developed backend applications, database-driven systems, and automation solutions through academic projects and hackathons. Strong foundation in Python, C++, SQL, system architecture, and secure software development.

EDUCATION

University of Wollongong | Singapore | Oct 2024 - Sept 2026 (Expected)

Bachelor of Computer Science (Double Major in Digital Systems Security & AI and Big Data)

- **Relevant Coursework:** Cryptography, Database Systems, Big Data Mining Techniques, AI & Machine Learning, Algorithms & Data Structures, System Security, IT Project Management, Web Security.

Wenzao Ursuline University of Languages | Taiwan | Sept 2018 - June 2023

Associate degree in German with a minor in English

ACADEMIC PROJECTS & EXPERIENCE

TradeReady - AI-Powered Cross-Border Compliance Platform | SEA x OpenAI Hackathon | June 2026

- **Designed** AI-powered compliance workflows that automated cross-border trade requirement analysis across Southeast Asian markets.
- **Coordinated** system architecture planning and regulatory data mapping, helping the team achieve a Top 40 finish among nearly 400 registered teams.

Ad Traffic Filtering System (Backend & Risk Control)

- **Developed** a Node.js and C++ traffic monitoring solution to detect abnormal click activity and duplicate traffic patterns.
- **Automated** anomaly detection workflows, improving operational efficiency and reducing redundant resource consumption.

RingCT E-Voting System (System Architecture & Security) | Final Year Project | Ongoing

- **Designed** secure authentication and voting workflows for a privacy-preserving e-voting platform.
- **Authored** security specifications and access-control requirements to strengthen anonymity, integrity, and system security.

HackXperience 2025 Web App | SIM IT Club Hackathon | May 2025

- **Built** backend services using MongoDB and REST APIs to support collaborative user workflows.
- **Integrated** AI recommendation features, streamlining coordination and improving platform functionality.

CO-CURRICULAR & LEADERSHIP EXPERIENCE

SIM - University of Wollongong Student Council (UOWSC) | Aug 2025 – Feb 2026

- **Coordinated** communications among students, university stakeholders, and external partners during large-scale events.
- **Managed** event operations and issue resolution under tight timelines, ensuring smooth execution of student activities.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python (ICT GLAD Certified), C++, SQL, JavaScript, Flask, Node.js, TensorFlow, Pandas, Scikit-learn
- **Databases & Tools:** MySQL, PostgreSQL, MongoDB, Git (CI/CD), Docker, Linux, REST APIs
- **Concepts:** OOP, System Architecture, SDLC, DevOps, Security Engineering
- **Spoken Languages:** Mandarin (Native), English, German (Goethe-Zertifikat B1), Korean and Japanese (Basic)
